

## COLOURS

SILVER

WHITE

CUSTOM  
RED, BLUE & CUSTOM

## SPECIFICATIONS

- Power Supply = 240v 50/60 Hz
- Energy Usage = 1300 watts
- Dimensions = H.650mm x W.300mm x D.190mm
- Weight = 8kg
- Temperature and Electric Safety Sensors

## WARRANTY

- 5 Year Parts & One Year Labour
- Guaranteed for 1,000,000 uses within this period

## ASK ABOUT FINANCE

- From as low as \$1.50 a day

# PROBLEM WITH CURRENT HAND DRYING

## JET DRYER SOLUTION

### FAST

- 3 sensors detect your hands and then powerful airflow from jets in front and back of hands wipe the water off in rapid time

### CLEAN

- Air filtration with an antibacterial coating helps clean the air and assists in reducing the spread of bacteria
- Collects excess water to reduce mess and cleanup

### SAVE

- Environment – no paper going into landfills
  - Paper towels cost approx \$0.02 per average use.
- JET DRYER can dry 20+ pairs of hands for the same cost, saving money
- Other hand dryers use up to 2400 watts and take 30+ seconds to dry.

JET DRYER can use far less electricity at 1300 watts in approx a third of that time

### PAPER TOWELS

- Expensive
- Environmentally Unfriendly (Wastes natural resources e.g. paper, which cannot be recycled, chemicals used in production)
- Time/labour intensive = requires constant refilling of dispensers and also disposal of waste

### CURRENT HAND DRYERS

- Too slow to dry
- No air filter = dirt and bacteria sucked in by the dryer, blows onto your hands and into the surrounding air.
- No water catchment = wet floors (health & safety issue)

# ULTRA HIGH SPEED HAND DRYER

### EFFICIENT

- Approx 10-15 seconds to dry hands compared to 30-40+ seconds of some conventional hand dryers
- 90+% savings compared to paper towels
- Rated power usage of 1300w compares to much higher for other hand dryers
- Shuts off automatically when user removes hands

### HYGIENIC

- Touch free operation reduces chance of user contamination
- Air Filtration with an antibacterial coating reduces bacteria in airflow
- Anti Bacterial Coating on external surfaces, reduces bacteria build up on the hand dryer
- Collects excess water removed from hands, rather than dropping on floor which can then require constant cleaning

### QUALITY

- Noise Absorption Module decreases noise level to <65db
- Burn proof ABS plastic
- Electrical and Temperature Sensors for Greater Safety

### EXTRAS

- Aroma option puts fragrance into air surrounding unit
- Speed Adjustment (Three programmable speeds for different user setting e.g. hospitals, schools)
- Four Different Colours - White, Silver, Blue & Red
- Easily cleaned / replaceable filters when clogged with dirt and bacteria
- Plug in or hard wired electrical option.
- Stylish design with blue leds and operator lights.. Great way to upgrade the look of the bathroom.
- Environmental & Cost Savings ...Please contact us for cost savings report...
